The Director queried the DD/S&T about a Reuters dispatch from Moscow on electronic signals from a Soviet satellite. DD/S&T will look into this further and will try to convene the Space Panel sometime during this month.

The Director discussed the Agency's recruiting program. DD/S noted that our program calls for activity on 460 campuses, of which only 10 to 12 show signs of trouble. The Director advised that the Agency's policy will be to continue on campus when we have no indications that protest demonstrations might occur. DD/S should monitor this on a daily basis. When demonstrations are possible, recruiting will be done off campus.
